- **Limited 2 Year Warranty**

The 500 ATV Phoenix Fogger offers golf courses, country clubs and other small resorts and towns access to the same mosquito control technology used by state and municipal governmental agencies. Pre-calibrated at the factory, the unit's "turn-on-and-go" design offers an easy way to implement or maintain an effective on-site mosquito control program.

The 5.5 Honda engine, with electronic key start, and FMI pump make the 500 ATV a highly reliable piece of equipment. And, the five gallon chemical tank meets the need for treating larger areas.

Phoenix Foggers are designed and manufactured by ULV specialists with over 50 years experience. These state-of-the-art ULV aerosol generators are specifically engineered to provide durability, ease of operation and increased versatility.

The Power to Perform™

MODEL 500 ATV

- Designed and manufactured by ULV specialists with over 50 years of experience
- Powered by a reliable, easy-to-start 5.5 HP GX 240 Honda OHV industrial engine
- Steel construction with durable, chemical resistant, powder-coat finish on all frame parts
- Reliable v-belt driven system
- Vortical nozzle, constructed with brass and stainless steel, fixed position
- Compact, designed for easy handling; includes handles for lifting
- 5 gallon poly pour-clean formulation tank
- 150 CFM belt-driven, positive displacement blower with compact air filter
- Maintenance-free electronic start / keyswitch
- Dependable FMI pump
- 3 quart steel gas tank
- Meets or exceeds all label requirements for ground ULV products, including malathion
- Easy-to-use remote control
- Limited 1 year warranty

OPTIONAL FEATURES

- 360 degrees nozzle swivel
